April 9, 2020

Students, parents/guardians, and school staff,

As we take a break from remote learning, I want to thank students, family members, and staff for their part in this distance learning experience. During this difficult time, everyone came together to ensure continued learning. As we wait to hear additional news from the state and national governments our plan is to continue online instruction until we can reopen our physical facilities. As we acknowledge that the remote learning environment cannot replace the daily interactions with students and staff, we are committed to continuously reaching out to every student to provide support and guidance.

As our school community prepares to provide educational resources for students we ask everyone to please take the necessary precautions to stay safe and healthy. I encourage everyone to follow health official guidelines. Our school building is currently closed to students and only essential personnel are permitted to enter. Although the current situation can be stressful and overwhelming at times, keep in mind that our staff is here for both our students and their families. We are simply an email or phone call away.

Our district team continues to focus on remote learning and will incorporate additional opportunities for students and staff communication. I encourage everyone to take time away from screens to be with your family. Again, thank you all for all you do. Be well.

Thank you -

Daniel Kerr

Assistant Superintendent
