

Somerset County Educational Services Commission

2019 EXTENDED SCHOOL YEAR

The SCESC's ESY program provides educational and emotional support during the summer months. Experienced staff members instruct and counsel students to provide a supportive extension of the regular school year.

We offer curriculum-based instruction, educational and recreational field trips, as well as a practical, hands-on work experience. Students, age 14 and above, may be eligible to participate in our School-to-Work Program and will be eligible to earn wages or community service hours while learning valuable life and career skills required for the workplace.

Each staff member is trained to deliver flexible and individual instruction to a diverse student population. All staff and administrators are experienced in working with a special education population including behavioral disorders.
